

MOBILE ANCHORAGE

SYAM

[AMPS]

Use (see installation and operating instructions)

The SYAM (Mobile anchoring system) is a temporary anchor point located above the user that prevents any risk of a fall.

Avantages

- Assembly in less than one minute
- Rucksack-transportable mobile equipment
- Site remains clean
- Allow work with both hands free
- Can be used in whatever situation directly in front of the work place or at a distance
- Also allows to secure the material during its handling

Technical specifications

- Standard PPE Category 3 – EN 795 Type B
- Usable by two people
- Light weight (15kg)
- Pressure free on ceiling (can be used on any type of ceilings or false- ceilings)
- Up to 4m20 height
- Patented

CERTIFICATION : EN 795 Type B : 2012

Training

Mandatory technical training (4 hours for 4 people) provided by the supplier on your premises or on site (training certificates provided)

Inspection

PPE Category 3 is inspected regularly in a defined time period - at least once a year (European Directive 89/656/EWG)
